**Abstract:** Report of the Project “*Lepidoptera of Indo-China (LIC)*” 1- Temporary index of the species group names of the *Lepidoptera*. *Cent. ent. Stud., Priamus Suppl. 16*: 1-330, 81 figs.

In this publication, totally 11474 valid species group names of *Lepidoptera* recorded in Indo-China (Myanmar, Andaman Islands, Thailand, Laos, Cambodia, Malaysia, Yunnan, Hainan, Malaysia, Singapore, Borneo) based upon the Info-system of the Cesa are listed alphabetically. Synonymous names arranged chronologically are given to each taxa.

**Keywords:** *Lepidoptera*, species, subspecies, list synonyms Indochina, Myanmar, Andaman Islands, Thailand, Laos, Cambodia, Malaysia, Yunnan, Hainan, Malaysia, Singapore, Borneo.

The research project of the “Lepidoptera of Indo-China (LIC)” was announced in 2006.<sup>3</sup> It is also related to the more comprehensive projects of the Cesa, namely Lepidoptera of Orientalic Region (LOR) Lepidoptera of Asia (LAS) Lepidoptera of Old World (LOW), and finally Diversity of the Lepidoptera in the World (DLW). The Project Lepidoptera of Thailand (LTH)<sup>4</sup> is also a part of the present Project.

The Project (DLW)<sup>5</sup> is currently supported by the Cesa only. Previous temporary results of the Project were published in the earlier issues of the various Cesa publications.<sup>6</sup>

In the temporary list of the species group names of the Lepidoptera, the scientific valid names of the taxon is given with the author and the date of publication. Its family name is attached. The synonymous names are given in chronological order. The whole list is arranged alphabetically. Photographs were taken by the author from northern Thailand.

This temporary list is of course at the beginning; therefore many species are missing below. However, the studies on this Project are progressing gradually.

Currently, there is no similar scientific and modern attempt on the Lepidoptera fauna of the Indo-China, neither in Turkey, nor in abroad. Therefore, this Project has an important position among the faunal researches on the Lepidopterology in the World.
